Front End Engineer | Live Service Team Lead | React · TypeScript · AWS · CI/CD

Profile

Front End Engineer and Live Service Lead specialising in React, TypeScript, and user-centric web platforms. Experienced in leading live-service operations, resolving production incidents, and driving continuous improvement across enterprise-scale systems. Skilled in delivering high-performing, maintainable front-end solutions that enhance user experience and meet demanding quality, security, and performance standards.

Education

Makers Academy | Software Engineering Bootcamp (2021)

Full-stack development using OOP, TDD, and Agile. Delivered group projects integrating React, Rails, and Node.js, covering full CI/CD workflows.

University of Plymouth | BSc (Hons) Mathematics and Finance (2016)

Skills

Languages: TypeScript, JavaScript, React, GraphQL, HTML, CSS, Node.js

DevOps & Infrastructure: Jenkins, GitHub Actions, Docker, Kubernetes, AWS, CI/CD

Frontend Tooling: Storybook, Vite, Tailwind, Material UI, Jest, Cypress

Monitoring & Ops: Incident Management, Service Ownership, Post-Release Monitoring

Practices: Agile Scrum, Test-Driven Development (TDD), Pair Programming, Code Reviews, Continuous Delivery

Additional Skills: AI Agents & Automation, Analytical Problem Solving, Stakeholder Engagement, Technical Mentorship

Experience

Deloitte Digital | Manager – Front End Engineer / Live Service Team Lead

June 2021 – Present

React · TypeScript · GraphQL · Jenkins · AWS · Kubernetes · CI/CD

- Lead developer and Live Service Team Lead on Project Blackjack (public-sector client).

- Designed, developed, and maintained a React + TypeScript dashboard enabling users to access key data and navigate dynamic content views.
- Leveraged AI agents to accelerate development workflows, automate repetitive tasks, and enhance code quality during feature delivery.
- Owned incident management and triage, coordinating between client teams, developers, and BAs to resolve live production issues and minimise downtime.
- Collaborated with QA, DevOps, and design teams to ensure stable releases, security compliance, and smooth post-deployment performance.
- Mentored new joiners through detailed onboarding sessions; enabled immediate contribution to active sprints.
- Continuously improved delivery pipelines via Jenkins and GitHub Actions for safe, automated deployments.
- Promoted a dev ops mindset in front-end teams, integrating observability metrics and feedback loops into release cycles.
- Impact: Enhanced platform reliability and user experience for tens of thousands of end users; reduced average incident turnaround time by ~30%.

Marks & Spencer | Business Analyst (Systems & Development)

Jan 2017 – Oct 2020

- Supported program management in delivery and deployment of new software systems.
- Automated internal dashboards and reporting pipelines using Excel, PowerBI, and scripting.
- Conducted hands-on testing and validation of platforms before wider rollout.

Age UK Wandsworth | Volunteer

Oct 2017 – Present

- Supported elderly residents through community programmes, strengthening communication and empathy skills.
